Just got off a CC with RCRA folks, Bruce Jones and Ed Q. The bottom line is R6 RCRA is in agreement with the Waste Management Plan as it stands now unless something else changes. Meaning that Exxon-Mobil is required to profile the wastewater in the frac tanks to determine if it is RCRA hazardous or not and dispose of it accordingly. LDEQ was not in error on its judgement to allow disposal of the mtl with 8% recoverable oil but that percentage appears to be in error therefore that wasn't considered. Mark Potts is going to send an email back to ADEQ (Tammie Hynum) relating the above. Thanks.

Subject: Mayflower waste water

What is the status of resolving the Mayflower waste water issues? Have we seen any kind of draft letter regarding the RCRA exemption? Need to make sure that we are dealing with LDEQ appropriately on this.
